ABOUT ME

I am María Sol Olmos, a Full Stack Developer and Industrial Designer. I consider myself a highly motivated professional, having graduated from the SoyHenry bootcamp, where I acquired strong skills in both front-end and back-end development. This enables me to create complete and functional web and mobile applications using technologies such as JavaScript, React, Redux, Node, Express, Sequelize, PostgreSQL, HTML, CSS, Docker, Docker Compose, MongoDB, and Wordpress.

During my training, I worked on a variety of projects, both individually and as part of a team, applying agile SCRUM methodologies. This allowed me to develop a deep understanding of programming principles, problem-solving, and effective collaboration.

In addition to my web development skills, my background in industrial design provides me with a unique perspective to tackle design challenges and user experience. I can apply my knowledge to create intuitive and visually appealing interfaces, paying attention to aesthetic details, to develop visually attractive and functional web applications.

Previously, I worked in graphic design focused on digital marketing and online community management. Using tools such as CorelDraw, Illustrator, Canva, and Figma, I developed graphic designs and content strategies, interacted with users, and fostered active participation on social media and other digital channels. I believe that effective communication and community engagement are key elements for the success of any project.

I believe that my combination of technical and creative skills allows me to bring a comprehensive approach to projects and collaborate effectively with different teams. I am excited about the opportunity to contribute value from my experience and continue learning and growing every day. Feel free to contact me for any inquiries or collaborations.

TECHNOLOGIES

- **Development Tools:** React, Bootstrap, CSS, Redux, JavaScript (ES6), PostgreSQL, Sequelize, HTML, Figma, Frammer Motion, Docker, Docker Compose, MongoDB, Scrum, Git, Postman, Wordpress, Next.js
- **Management Tools**: Trello, Slack.
- **Design Tools:** Illustrator, Photoshop, CorelDraw, Canva, Solidworks, Rhino, Blender, Autodesk123

PROJECTS

Henry Bootcamp - WALLAby

June 2022 - July 2022

Alongside my peers, we developed an NFT Marketplace where users can buy, sell, and create their own NFTs. Users can connect to a test blockchain network and operate within the app. It also has Web3 connectivity through the Metamask wallet. I worked as a Full Stack Developer implementing features such as:

- Landing page.
- Chatbot.
- Admin panel.
- Authentication login.
- Responsiveness.

Technologies used: JavaScript, React, CSS Modules, Redux, Node, Express, MongoDB, Mongoose, WEB3, Solidity (For smart contract creation).

Henry Bootcamp - Recipe App

May 2022 - June 2022

It is a cooking recipe application that consumes data from an external API (Spoonacular) and a database. It has an initial page from which you can access the main page, where all the recipes are shown. Accessing each one, you can see more information about it. The application allows you to search by name, filter by diets, and sort alphabetically and by score. It has pagination and also allows the user to create a new recipe through a controlled form.

Technologies used: JavaScript, React, Redux, Pure CSS, Node, Express, Sequelize, PostgreSQL.

PROFESSIONAL EXPERIENCE

Graphic & Web Designer - Digital Marketing and Communication

March 2020 - February 2024

Mos Creative Agency, Córdoba, Argentina.

- Implementation of creative strategies for the growth, positioning, and effective communication of products and services, according to market requirements.
- Analysis and research of the audience, identifying opportunities to drive innovation competitively.
- Visual communication across different platforms to attract new clients and consumers.
- Development of Corporate Identity to establish the pillars of a brand with a strong, consolidated, and professional vision aligned with the aspirational values of the client.
